

Advanced
Automation
Technology

Achieve Superhuman Productivity.

SymKey's powerful automation technology performs a predefined series of actions on hundreds of claims at a time within your existing claims system.

Here's how it works:

1. Open SymKey and load a list of Claim IDs.
2. Filter which claims to process based on selected claim status.
3. Select whether to complete, deny, or change status.
4. Specify any advanced editing actions to be performed.
5. Click the Process Batch button to launch SymKey.

SymKey...

*The Fastest Way to Process your Claims!*TM

www.hcim.com • 888-454-0202, ext. 5 • info@hcim.com

Our clients have achieved processing speeds equal to **1,000 claims/hour!**

Feature

Benefit

30-Day Risk-Free Trial

- Go live in 3 days
- Productivity reporting
- Measurable return on investment

Be certain that SymKey is a good fit for your organization before entering a licensing agreement.

Quick & Easy Setup

- Onsite product implementation
- Configuration support
- Comprehensive testing

Focus on business as usual while we do all the hard work and configure SymKey to accommodate your unique business needs.

Responsive Product Support

- Onsite user training
- User documentation
- Dedicated support team

Running SymKey is easy. Our Product Support Team offers hands on training and technical support at no additional cost.

Immediate Operational Efficiency

- Powerful auto-adjudication
- Processing speeds 20x faster
- Process up to 1,000 claims/hour

Focus on other tasks while your providers enjoy the faster turnaround times and improved accuracy.

Searchable Electronic Databases

- Batch reports
- Productivity reports
- Historical record index

Perform claims research quickly and efficiently, measure your productivity, and simplify the audit process.
